

## Lyceum Health's Clinical Assessment Program

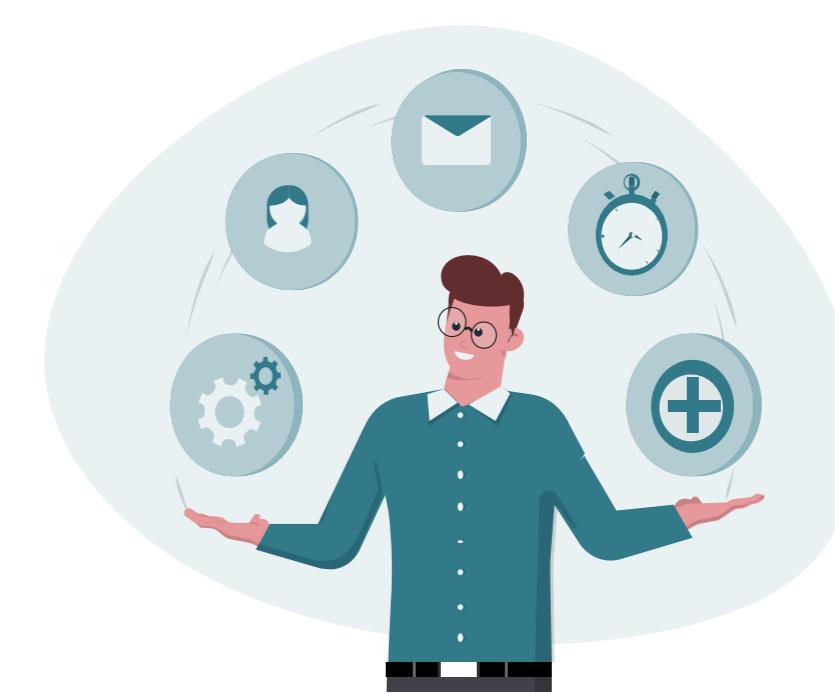

*Our Clinical Assessment Programs (CAP for short) reduce your practices administrative burden while improving visibility to patient experience when starting and switching therapies.*

Receive real time insights from assessments

Distribute patient education and clinical instructions

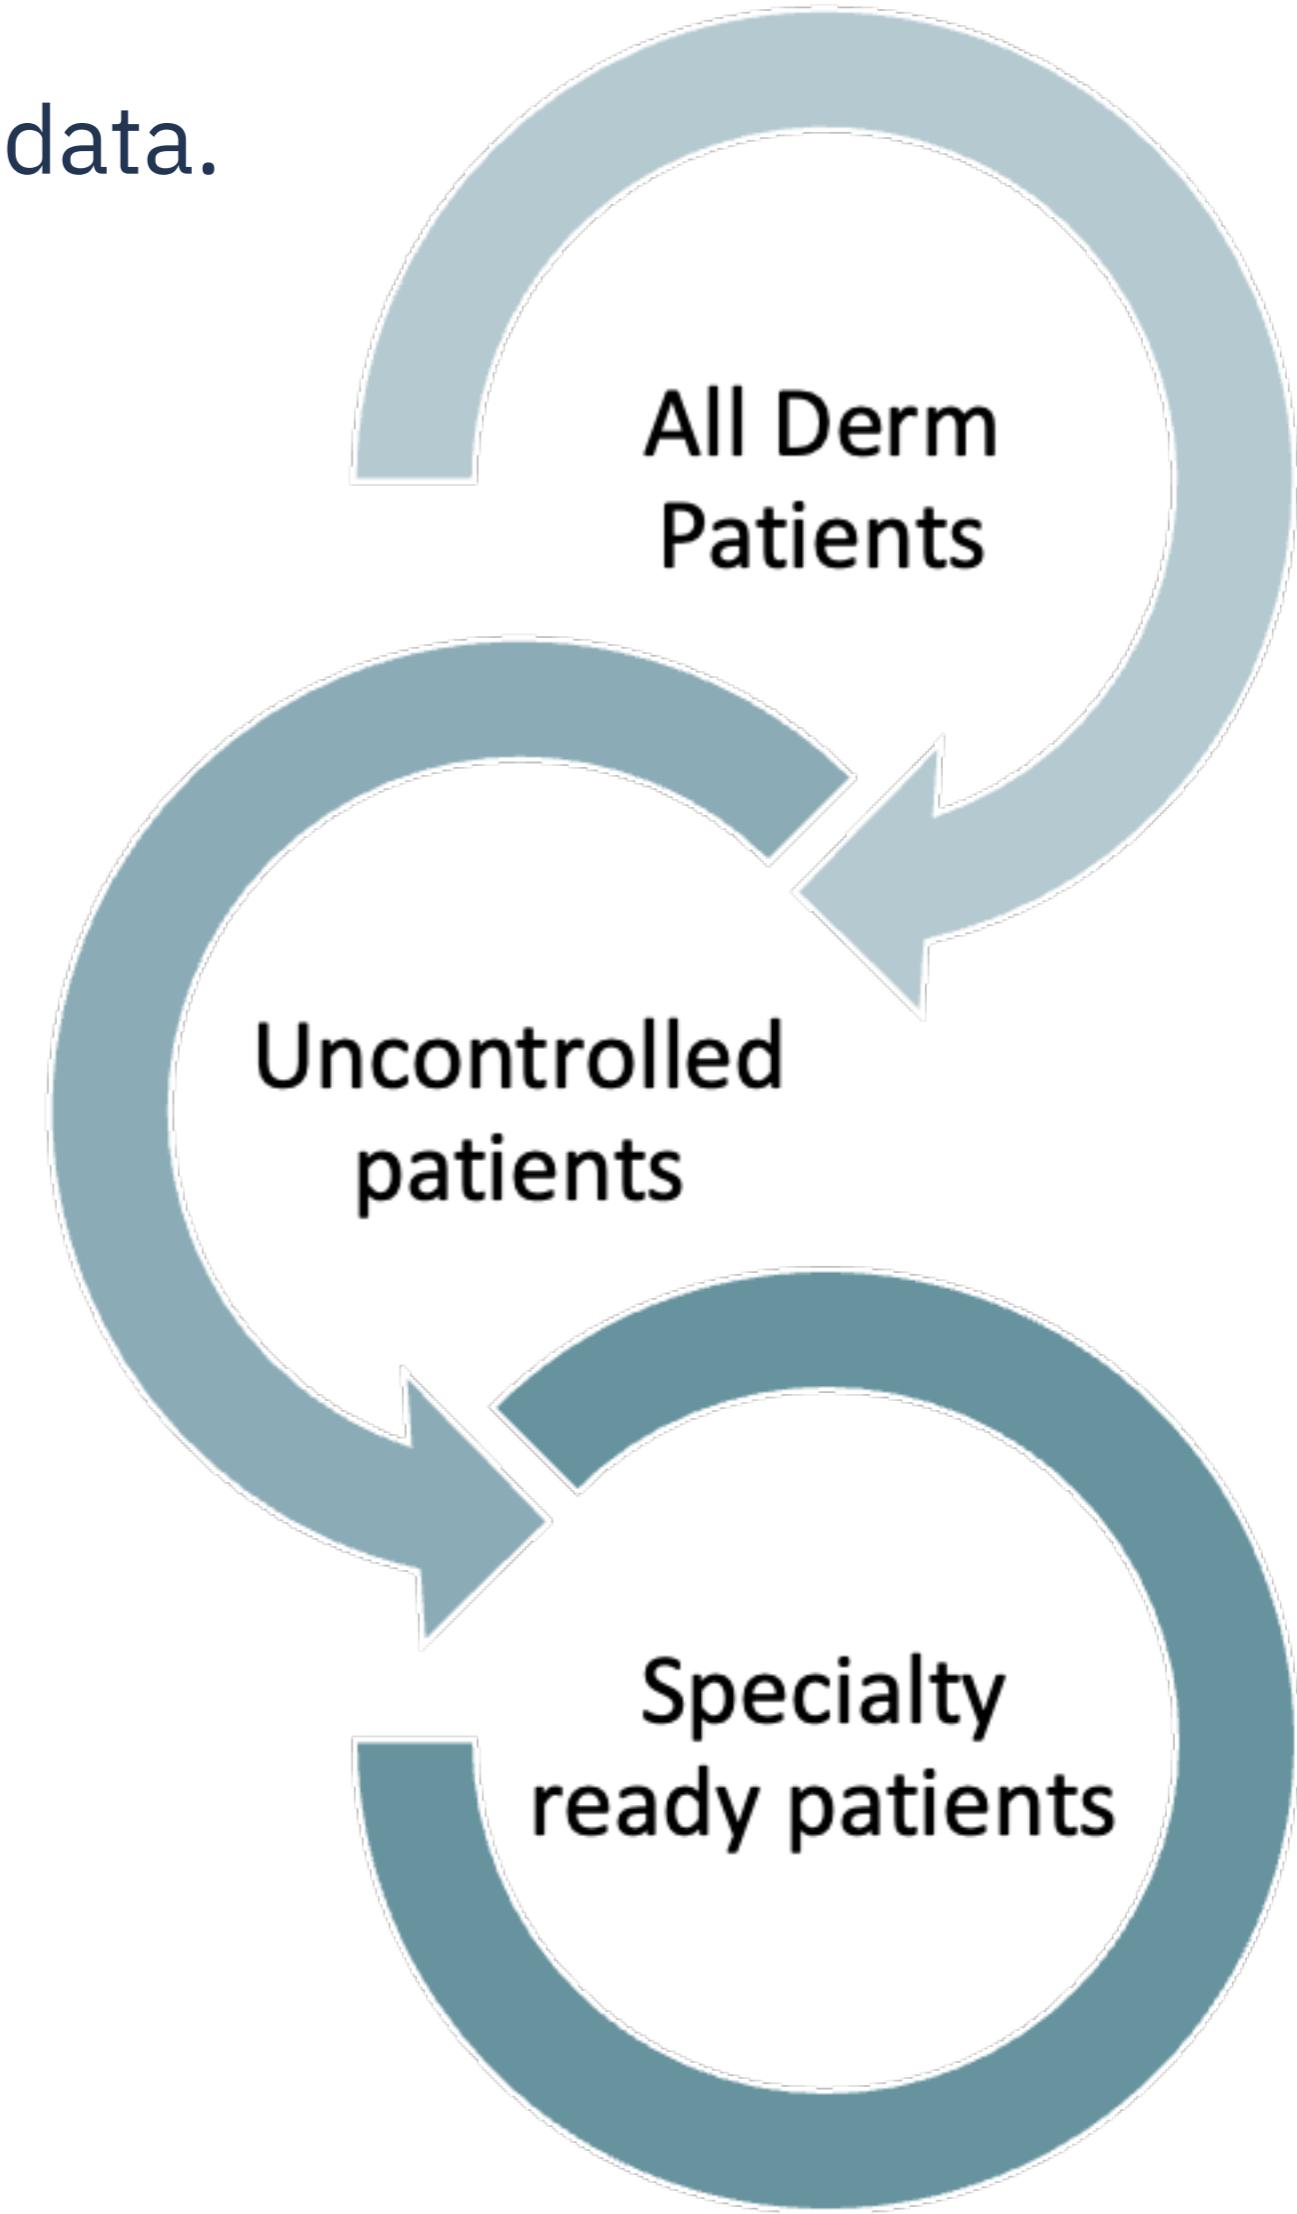

Optimize your patient's treatments

### Benefits

- Improved connection to patients between clinic visits for insights and time-saving, up-to-date data.
- No more searching for decision-making data - reports on 1 screen, few clicks, and little to no clinic data input required.
- PSP & special program forms auto-filled to save your clinic time.
- Clinics remain the custodians of ALL data.

### Advanced security features for safe, private user data.

- Data stored in Canada, encrypted in transit and at rest.
- Rigorously and regularly tested by 3rd parties certifying data security.
- Web application login for authorized users only.
- Adheres to all privacy, security laws and regulations including CASL, PIPEDA, and various others such as provincial requirements.
- No personally identifiable patient data shared with 3rd parties.

**88%**

of physicians worry that their patients are not adhering to treatment as prescribed.\*

**41%**

of physicians report that to properly manage patients' chronic conditions, they should see them 3-5 times a year, but regularly see them less than half that amount.\*

**7 in 10**

patients say their doctors are limited to only 10-20 minutes in an office visit.\*

**1 in 5**

patients struggle to stay on top of their medical issues and need more help.\*
